

Entering Presentations Records

ALL research and creative activity related Teaching, Research, Extension, and other presentation records are entered in the Presentations screen under the Research and Creative Activity section of the Manage Activities page.

NOTE for Extension Personnel: If a presentation was made for extension clientele, report it in the “Implemented Educational Programs, Products or Services” screen — NOT in the Presentations section. An example of a Presentations entry would be your presentation given as a result of an invitation to speak at an annual meeting of a state or national professional organization.

Tip for entering records

If you have the presentation citation entered in a CV file, use the **PasteBoard** feature to copy-and-paste content into the fields. This feature allows you to select-and-drag a portion of the content from the PasteBoard area into the specific text field.

In this sample screen, the Presentation Title has been selected in the PasteBoard area. After the text is selected, click-hold-and-drag the content into the appropriate field text box (indicated by the vertical bar and gray text). Release the mouse button to place text. The text is removed from the PasteBoard area.
