Why are the bees dying in Mead, NE?
How are they becoming exposed?
What does this say about the area?

- AltEn** used surplus/outdated pesticide-treated crop seeds in ethanol production
- Producing large amounts of solid and liquid waste with high pesticide loads
 - Estimated to have processed ~780,000,000 - 1,170,000,000 lbs? since in 2015
 - ~ 33,400 tons (or 66,800,000 lbs) were distributed to local farms in 2018-2019

One Health approach to investigate potential impacts of systemic pesticide pollution from improperly discarded treated seed waste:

- Environmental Quality: spread & extent of contaminants in water, soil, & vegetation?
- Human Health: long-term exposure, developmental effects?
- Ecological Systems: loss of bioindicator species (pollinators) and food web support?

Revenue Forecasting Board

Economic forecasting board raises revenue projections

April 29, 2021

In its final meeting before the Legislature considers possible adjustments to several bills that would cut tax revenue, the Nebraska Economic Forecasting Advisory Board voted April 29 to raise revenue projections in the short term.

The board provides an advisory forecast of general fund receipts.

Revenue projections for the current fiscal year were raised by \$90 million to \$5.6 billion. The adjustment was based on anticipated increases of \$65 million in corporate income tax receipts and \$25 million in individual income tax receipts.

Total projected revenue receipts for FY2021-22 were lowered by \$5 million. The FY2022-23 projections remain unchanged.

The next meeting of the board is set for Oct. 29.

Budget outlook

Budget next steps:

- Pres. Carter to meet with Legislative Appropriations Committee on Oct. 5 to discuss next round of COVID-19 relief funds.
- This is the chance to put some big ideas on the table about things only the University of Nebraska can do.
- Agriculture will play a large role in this.

Midlands Voices: Event today to highlight UNL ag innovation and federal support for research

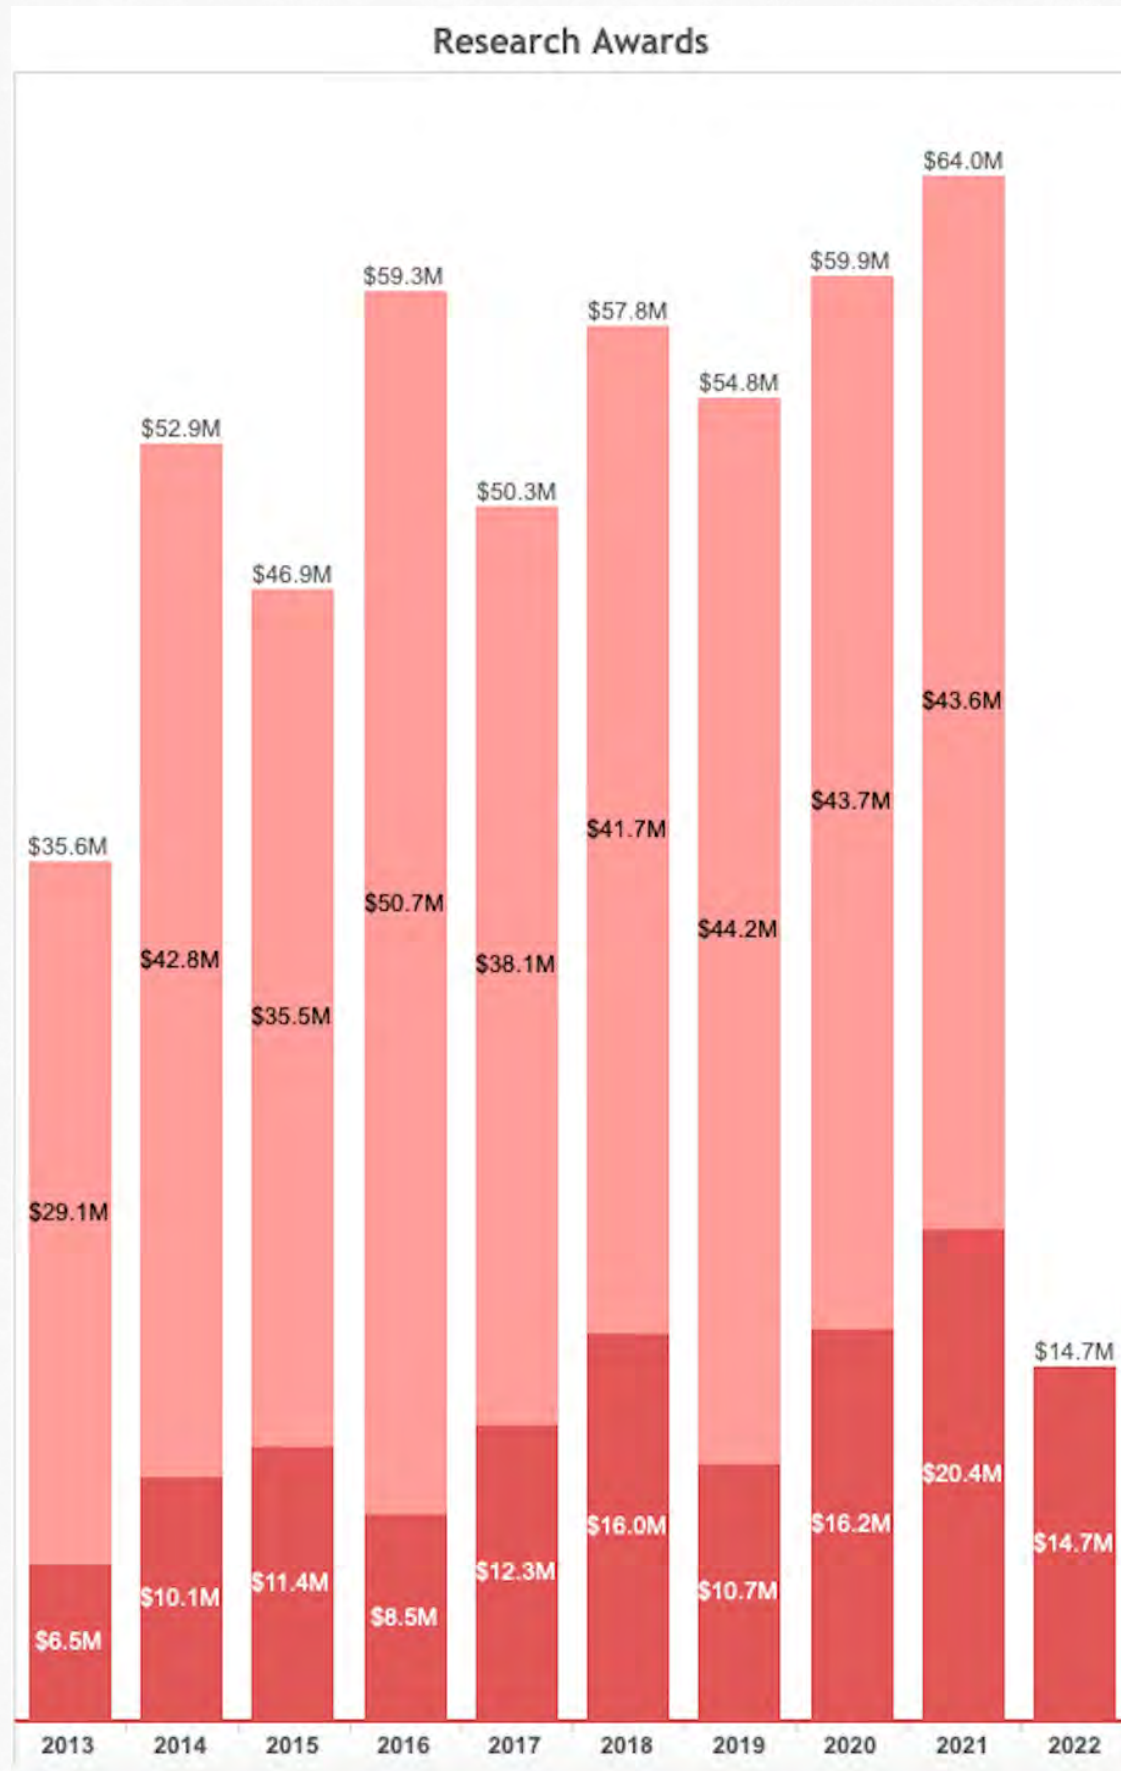

Mike Boehm Aug 20, 2021  0

Nebraska and agriculture are inextricably linked, something most Nebraskans know well and for many is a source of great pride.

Nebraska has the third-largest agricultural economy in the United States, and one in four jobs here is, in some way, tied to agriculture. While Nebraska, like many traditionally rural states, has seen its population shift toward urban areas over recent decades, many Nebraska city-dwellers still have personal ties to our agricultural heritage and the global food system.

But while Nebraskans are aware of our state's agricultural tradition, fewer know of our state's growing role in shaping agriculture's future and addressing wickedly complex global concerns related to water and food insecurity

All Hands Meeting September 2021

2021 ARD research

- IANR researchers awarded \$64M in FY2021
- highest total in IANR history
- 470 externally-sponsored awards in 2021
- Externally funded research dollars have increased by an average of 4.8% per year since 2012

CASNR enrollment update

Increase in new students (first-time freshman and transfer students)

- 593 new students for Fall 2021; increase of 3.5% from Fall 2020
- First-time freshmen up 8.7% from Fall 2020 (+35 students)

93% of eligible CASNR undergraduate students from the Spring 2021 semester enrolled for the Fall 2021 term

Largest graduating undergraduate class in the history of the College

- Increase of 10.6% from 2019-2020 (+65 students) (excludes Summer 2021 graduates)
- 2019-2020 second largest graduating class
- Increase of 23% over last 5 years (excludes Summer 2021 graduates)

CASNR enrollment update (continued)

Graduation rate:

Highest 4-year graduation rate in the history of the College

- Increase of 2.5% from 2019-2020

Overall Enrollment:

- Overall undergraduate enrollment is down. Major factor impacting enrollment was student success – successfully graduated that largest number of graduates in college history and leading the University in 4-year graduation rate
- Graduate enrollment held steady with a 0.4% increase (+3 students) compared to Fall 2020
- Professional enrollment increased by 4.1% (2 students) compared to Fall 2020

Thriving Young Children

The **Nebraska-Brazil Early Childhood Partnership** is addressing critical early childhood challenges, including early learning, mindfulness and compassion in caregiving, substance abuse among teens, and engaging vulnerable communities in family and child development.

Comprehensive Health & Well-Being

Through the **Community Based Participatory Research Program**, the Umonhon Nation Public School in Macy is creating a K-12 food sustainability program to support accessibility and distribution of traditional healthy edible and medicinal plants to the Omaha Tribe.

Strong Communities

The **Teacher Scholars Academy** is growing the next generation of diverse educators that will lead the way for educational change! Of the 120 scholars currently in the program, 101 are from Nebraska coming from 42 different communities across the state.
